BETAVIEW®
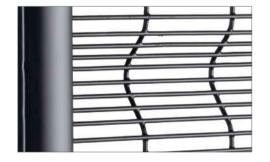

The leading perimeter security fence offering aesthetic protection and rigidity.

Product detail

FEATURES & BENEFITS

Aesthetic design
Betaview is designed and manufactured to suit specific South African needs for superior protection whilst maintaining a high level of aesthetics and longevity.

Reliable protection
Apertures of 76 x 12 mm make it difficult to climb and cut while reinforcing V bends across the panel increases its rigidity.

Visibility
Betaview delivers excellent visibility through the fence and appears almost invisible from a distance, even at an angle. It is ideal for use with surveillance systems.

Compliant 3m wide panels
Panel widths meet the maximum distance requirement for electrical fence installation compliance.

Tamper resistant fixing mechanisms
Expertly designed posts and superior fixing mechanisms maintains the complete installation's integrity and resists against attempts to pry panels loose from the post.

Full system 10-year guarantee (standard terms & conditions apply)
Superior coatings underpin our 10-year anti-corrosion guarantee when the full system (panels, Bekafix Secure posts, and stainless steel fixators) is used.

Security level

LOW — HIGH

Applications

RESIDENTIAL | EDUCATIONAL FACILITIES | DATA CENTERS | COMMERCIAL PROPERTY | INFRASTRUCTURE & TRANSPORT

Functionalities

DELAY | DESIGN | DISSUASION

Panels

The panels are made from 3mm diameter ZincAlu® Super coated core wire (3.4mm when PVC coated) with apertures of 76.2mm x 12.7mm.

The small apertures make the fence difficult to cut and climb. Available in 3m wide panels and three standard height options.

Other heights available on request.

Panels made from 3.96mm core wire (4.4mm when PVC coated) and different wire configurations are available on request.

Gates

For comprehensive access control solutions that ensure a uniform level of security throughout your perimeter, inquire about our fit-for-purpose range of swing and sliding gates.

Quality Assurance

Our range of high-security products are locally manufactured in our South African ISO 9001:2015 quality certified facility.

Durable High-Quality Coatings

Highly durable Zincalu® Super and optional PVC coatings guarantee an extra-long lifespan and low maintenance, delivering extreme protection in even the harshest environments.

Available in Zincalu® Super only or with an additional PVC coating on panels in green RAL 6005 or anthracite RAL 7021.

Posts & Fixing Mechanisms

Bekafix® Secure posts are specifically designed and engineered to be used in combination with Betafence's panels. With Bekafix Secure, the fence is safely tucked behind the lip of the post, resisting against attempts to pry the panel loose. The panels are secured to the post with specialised fixators, firmly bolted through the post using stainless steel security bolts and shear-off nuts that protect against tampering.

This combination of Betafence panels with Bekafix Secure post and superior fixing mechanisms delivers a complete fencing system that ensures the installation's integrity and protection levels.

Optional features

Increase your perimeter's protection by adding sawtooth top rails to further discourage climbing attempts.

Additional Security Accessories

Extended posts and brackets are available to accommodate additional security features such as electric fencing*, flat wrap razor, or BTC coil toppings.

*Supplied and installed by third parties.

BETAVIEW (SOUTH AFRICA)					
Nominal fence height (mm)	Panel width (mm) (centre-centre between posts)	Number of reinforcing V bends / panel	Post length (mm)	Number of fixators / post	Bolts, washers and shear-off nuts / post
